

Baxter Single or Double Rack Ovens available in either Gas or Electric!

Australian Bakery Supplies (Qld & NT), Silverwater Bakery Equipment (NSW, Vic & Tas) and All Bake Services (SA) have teamed together to represent Baxter baking ovens and accessories in Australia. The providing of the complete range of Baxter products and accessories, plus installation and after sales service and support is simply a phone call away.

The Baxter single, double and mini rotating rack ovens are available in either gas or electric versions. The gas models utilise an "in-shot burner" system which has no moving parts and transfers the heat uniformly throughout the chamber via a corrosion resistant, weldless heat exchanger. The in-shot burner burns the gas more efficiently and with no moving parts removes the risk of product failure. This, combined with the patented steam system, utilises individual castings with a cascading drip system for efficient water conversion during the steam cycle, ensuring a quality and consistent bake every time.

The single point connection for ventilation minimises installation costs and the use of a flat floor and flush door design means that no ramps for loading trolleys are required.

Easy-to-use digital controls with individual bake and steam timers, vent control, fan delay, 99 menu programmability with 4 phases for each menu, plus 24 hour auto on/off control add up to a complete package that works for you and with you to enhance what you do best.

To find out more, and see how our complete range of Baxter products can benefit you, please contact your nearest retail outlet. You'll be glad you did!

Want to get more out of your Bakery?

From Bakery Café's to health conscious products, consumers expect more from Bakeries than ever before. At 888 we understand the equipment needs required for Bakery business success. Our range has been developed by experts to maximize productivity in key areas.

Our Maestro Mix Bakery products set a new standard for the Bakery industry. The Maestro Mix brand is recognized along with other famous names manufactured for European and American markets and come with CE and NSF compliance. Our huge mixer range covers all needs from small 10 litre planetaries through to the range-topping 3 bag spiral mixers. Other Maestro Mix quality products include Pastry Sheeters and Bread Slicers that are incredible value. The Maestro Mix quality bakery range are hard working assets for your business.

Benching, Racking, Trolleys and Cool Room Shelving are available in all sizes to suit your business needs. The tough 888 Stainless Steel modular benches are economical and quick and

easy to assemble to give you more production room. 888 Racking and Trolleys are also available in all sizes. Our Titan range of Cool Room shelving leads the industry for affordable storage solutions. Titan shelving's advanced engineering and unique features such as a galvanized first then powder coated surface ensures years of trouble free service.

What's more, value adding equipment can help bring in more money with the same amount of clientele. For instance Royston Juicers allow you to capitalize on highly profitable juice drinks for a small setup cost. With Royston bench top fryers and soup kettles you can economically prepare goods to complement your range. While Maxicoup Slicers are excellent for the sandwich bar.

To find out more about 888 brands, product range and our distributors simply call Chris 0400 657 795 and Trevor 0418 332 771 or visit our website www.888foodequipment.com.au
