

Flour Millers' Council
of Australia

Awards to Top Milling Students

Each year students throughout the world study for the Flour Milling Distance Learning Course examinations conducted by the National Association of British and Irish Millers.

The Flour Millers' Council of Australia (FMCA) has administered this course for Australia, New Zealand, Papua New Guinea and the Pacific Islands for over 40 years.

The Certificate awarded for completion of the course is recognised worldwide and has evolved over more than 70 years into the recognised standard for the cereal processing industry.

FMCA provides experienced tutors to evaluate student lessons and to provide expert guidance and assistance.

Currently 86 students, 57% from Australian Mills and the rest from New Zealand & the Pacific Islands, are studying to complete 120 course modules.

FMCA has traditionally made awards to successful students in memory of significant contributors to the industry.

For examinations recently completed the top students have again been recognised.

Desmond Grambeau from Laucke Flour Mills has been awarded the TM Fullarton Award for attaining the highest aggregate score in any two of the modules 5 to 7.

Jeremy Murphy from Young Roller Flour Mills in NSW has been awarded the Colin Taylor Commemorative Award for attaining the highest aggregate score in any two of the modules 1 to 4.

Yet another industry initiative promoting development of milling industry personnel is the Australian

Technical Millers' Association. The recent roadshow of technical seminars involved 112 participants at venues in Melbourne, Corowa, Perth and Brisbane.

Presenters contributed with excellent papers covering new developments in technology and equipment plus awareness of industry issues in hygiene and pest management, genetically modified materials, and the biorefinery of the future.

The Flour Millers' Council of Australia has actively supported the ATMA from its inception in 1963. ATMA are, 'to bring together members of the Cereal Milling and allied industries, and to encourage technical interest and knowledge to the betterment of the industry'.

Membership is open to those 'who are engaged or who have been engaged in a technical capacity in Cereal Milling and allied industries, and to those of other industries which serve them'.

FMCA is proud to announce recent new member companies both involved in specialty milling of wheat and other cereal grains.

FPM Cereal Milling Systems Pty Ltd is a new company based in Tamworth, NSW and brings new technology and alternative products to the market.

Kialla Pure Foods Pty Ltd., situated on the Darling Downs west of Brisbane, is Australia's largest organic cereal grain manufacturer and for over 16 years has supplied a wide range of cereal grains, specialty flours, semolinas, premixes and other value-added products.
